**IX. New Business:**

In depth discussion on continued concerns about damages to the trailer, equipment and a policy for trailer usage/accountability. Dale reported that OFA has received a lot of new equipment and wets. The trailer is currently operational at a class being held at Deer Creek. OFA is currently working with lawyers on a “loan agreement”. There needs to be a better plan for requesting, scheduling and accountability of equipment. Regions have asked that OFA to post a schedule so everyone can see where/when the trailer is being used. Dale also advised that they are looking to incorporate 3 days down time to all OFA to do an inspection of the trailer and equipment before being released for the next class.

It was recommended that maybe a cache of equipment be kept in each region because there is such a demand for the trailer.
