2019/2020 Emergency Preparedness Information

An important message from the Columbiana County Emergency Management Agency

Residents of Columbiana County
Keep this information in a handy place for ready reference

RESPONSE REQUESTED

DO NOT DISCARD
DEAR COLUMBIANA COUNTY RESIDENTS:

This brochure contains important information you will need if there is an emergency at the Beaver Valley Power Station. Although it is unlikely to occur, you need to be prepared.

In a Beaver Valley Power Station emergency there might be danger from radiation. Too much radiation can be harmful to your health. If a serious accident occurs, you might need to leave the area. Response plans are explained in this brochure.

The Columbiana County Emergency Management Agency is providing this information because it is important to you and your family in the event of an emergency. We ask that you read it all and talk it over with members of your family. Information that is included is:

• What you should do if you hear the emergency sirens in your area.
• What you should do if you are asked to “shelter-in-place.”
• What you should do if you are asked to “evacuate.”

Remember the best way to stay safe in an emergency is to know what to do. Stay calm and help each other. This brochure is designed to help you.

Enclosed with this letter are Special Needs Cards. These cards are very important in helping us successfully assist you should an emergency occur. One is for our farmers, and the other is for those who would need special help during an evacuation because of physical impairment or special medical problems. You should fill out this card every year if it applies to you and return it to us every year. You won’t receive a response to the card, but the information will be kept on file and will be used to notify you if an evacuation is ever required. We will mail the enclosed cards on an annual basis, and this information will be kept confidential. If you wish, complete and sign the card, turn the completed portion of the card to the inside, and tape the card shut. The card has pre-paid postage and will not require a stamp prior to mailing.

Please keep this brochure in a handy place for ready reference. Also, emergency information is available on your county emergency management website www.ccoema.org. If you would like a separate copy of this information please call our office at 330.424.9725.

Sincerely,

Peggy Clark
Director
Columbiana County EMA

When Sirens Sound

If there is significant information that could affect your safety, or if protective actions are required to protect your health and safety, the standard “Alert Signal” will be sounded over the siren system that has been installed within an approximate 10-mile radius of Beaver Valley Power Station. This signal is a steady three-minute signal – not a wailing or warbling signal. If the Alert Signal is sounded in your community, tune your radio or TV to one of the County Emergency Alert Stations. A message will be broadcast advising you what action should be taken. Municipal police and firefighters may conduct neighborhood notification using mobile public address systems or door-to-door notification as a supplement to the siren system. Sirens are tested annually.

EAS STATIONS FOR EASTERN OHIO

If you hear a siren, turn on a local radio or TV Emergency Alert System (EAS) station:

- AM 570 – WKBN (lead station)
- AM 600 – WSOM
- AM 1390 – WNO
- AM 1490 – WOHI
- FM 88.5 – WYSU
- FM 93.3 – WNCD
- FM 95.9 – WAKZ
- FM 98.9 – WMXY
- FM 101.1 – WHOT
- FM 105.1 – WQXK
- FM 106.1 – WBBG
- Channel 27 – WKBN (lead station)
- Channel 9 – WTOV
- Channel 21 – WMF
- Channel 33 – WTV
- Channel 45 – WNEO
- Channel 62 – WYFX

WHAT TO DO IF YOU ARE NOTIFIED OF AN EMERGENCY

- Stay calm. Turn on your radio or television to an Emergency Alert System station for information and directions.
- Stay off the telephone. The lines may be needed for official business. Your call could keep other people from getting emergency help.
- You may not be asked to do anything.
- EAS instructions will tell you the protective actions to be taken. The protective action could be Shelter-In-Place or Evacuate. Depending on the particular circumstances of the emergency, either protective action, or a combination, may be appropriate.

WHAT SHOULD I DO IF I’M TOLD TO SHELTER-IN-PLACE?

- Go indoors and stay there. Shelter pets.
- Listen to your local Emergency Alert System radio or television station for emergency information.
- Close all doors, windows and vents. Turn off all fans, air conditioners or other source of outside air.
- You might need to warn a friend or family member. If so, limit time spent outdoors. While outdoors, cover your mouth and nose with a damp cloth or towel. When returning indoors, leave outer clothing outside. Wash your face and hands with mild soap and lukewarm water.
- If necessary, children in schools in the affected area will be sheltered there. Parents should not try to pick up school children unless advised to do so.
- Use the telephone only if necessary.
- Do not pick produce or fruit. Food, produce, and packaged food already in your home are safe to eat.

WHAT SHOULD I DO IF I’M TOLD TO EVACUATE THE AREA?
WHAT ABOUT PETS AND GUIDE DOGS?

Pets. You may not take your pets with you to a care center. Plan now for your pet’s care in any emergency. It is recommended that you make prior arrangements with friends, relatives, or pet boarding facilities. If you need more information, call your county emergency management agency or department of emergency services.

Guide dogs. You may take your guide dog with you to a care center. It is recommended that you pack supplies in advance to care for your guide dog. If you need more information, call your county emergency management agency or department of emergency services.

WHAT IS POTASSIUM IODIDE (KI)?

The use of potassium iodide (KI) is an additional protective action. State and local officials will announce when the public should take KI in Emergency Alert System messages. KI is a nonprescription medication that blocks the uptake of radioactive iodine by the thyroid gland. KI does not protect a person or the thyroid from direct exposure to radiation. Taking KI only saturates the thyroid with nonradioactive iodine.

For most individuals, taking KI is safe; however, adverse reactions are possible in persons having existing thyroid conditions and those with an allergy to iodine. Consult your physician if you have concerns about the safety of KI for your child or yourself.

KI should be taken during an emergency ONLY if recommended by the Ohio Department of Health. KI is most effective if taken within 3-4 hours of exposure.

Residents living within the 10-mile radius, who have not already done so, may obtain more information about KI by contacting: Columbiana County Emergency Management Agency, 215 South Market Street, Lisbon, Ohio 44432 or 330-424-9725
Reception Centers and Pick-up Points

INFORMATION SPECIFIC TO BEAVER VALLEY POWER STATION EMERGENCIES

Although it is very unlikely that a nuclear power plant accident will occur that will cause severe health effects to the general public, a 10-mile Emergency Planning Zone (EPZ) is required around all nuclear facilities to assure that prompt and effective actions can be taken to protect the public in the event of an accident. Portions of Columbiana County are within the EPZ for the Beaver Valley Power Station.

If an evacuation order is issued, monitor local EAS stations for details.

RECEPTION CENTERS

A Reception Center is a location where you first go to register and receive general information including; assistance in contacting others and directions to a care center.

Residents that need temporary housing can then go to a Care Center. The Care Center is managed by the American Red Cross.

LIVERPOOL TOWNSHIP (SUB-AREAS 1 & 2)
• Negley Fire Department & Beaver Local Sports Complex

ST. CLAIR TOWNSHIP (SUB-AREA 3)
• Beaver Local Sports Complex

MIDDLETOWN TOWNSHIP (SUB-AREA 4)
• Negley Fire Department

PICK-UP POINTS

LIVERPOOL TOWNSHIP (SUB-AREAS 1 & 2)
• Hall China
• Dixmound Fire Department
• LaCroft Elementary School
• Westgate Middle School
• East Liverpool High School

ST. CLAIR TOWNSHIP (SUB-AREA 3)
• Calcutta Fire Department

MIDDLETOWN TOWNSHIP (SUB-AREA 4)
• None

Directions to Care Centers will be provided at the Reception Center
If you do not have transportation, go to a Pickup Point Location.

SPECIAL NEEDS CARDS

Enclosed with this brochure is a Special Needs Card. This card is very important in helping us successfully assist you should an emergency occur. The Special Needs Card is for anyone who would need special help during an evacuation because of physical impairment or special medical problems. If this card applies to you, please fill it out and return it to us. This information will be kept on file at your County Emergency Management Agency/Department of Emergency Services center. We request that residents submit a new card every year.

This information will be kept confidential. If you will require special assistance in an emergency, please complete and sign the card, turn the completed portion of the card to the inside, and tape the card shut. The card has pre-paid postage and does not require a stamp prior to mailing.

Emergency Classifications

There are Four Emergency Classification Levels at Nuclear Plants.

1. UNUSUAL EVENT
   The least serious, this refers to a small problem that poses no danger to the public, such as a decrease in plant safety or potential security event. No radiation leak is expected; you do not have to do anything. Federal, state, and county officials will be told right away.

2. ALERT
   During this minor problem, the plant could experience decreases in safety or a security event. Preparations are made to handle potentially more serious emergencies. Small amounts of radiation could leak inside the plant, but there is no danger to the public and you should not have to do anything. Federal, state, and county officials will be told right away and will begin emergency preparedness actions.

3. SITE AREA EMERGENCY
   This is a more serious problem, such as plant equipment needed for safe operations is affected or a security event occurs. Radiation releases are not expected to exceed federal limits beyond the plant boundaries. If you hear the sirens, listen to a radio or TV station that broadcasts Emergency Alert System messages and carefully follow instructions. Federal, state, and county officials will be told right away and will act to ensure public safety.

4. GENERAL EMERGENCY
   This is the most serious problem. Events are in process or have happened that may involve possible problems with plant equipment or security. These events may affect safe plant operations. Radiation could be released outside plant boundaries. Federal, state, and county officials will work with plant officials. You may have to protect yourself as described in this brochure. When the sirens sound, listen to one of the Emergency Alert System radio or TV stations for instructions and carefully follow them. If necessary, people in some areas will be advised to seek shelter or evacuate.

WENS Information

Sign up for Columbiana County Emergency Alerts. Be notified of emergencies or severe weather affecting your area.

WHAT IS THE WIRELESS EMERGENCY NOTIFICATION SYSTEM (WENS)?
The Wireless Emergency Notification System (WENS) is a system that allows emergency services to immediately send out text messages, voice calls, emails and pages in the event of an emergency or severe weather event.

HOW DO I SIGN UP FOR WENS?
Visit the CCEMA website www.ccoema.org or call 866-998-9367.

IS THERE A CHARGE FOR REGISTERING TO RECEIVE MESSAGES THROUGH WENS?
NO, this is a free service provided by Columbiana County EMA/9-1-1.

WHAT IF I DON'T HAVE A CELL PHONE?
Everyone in the service area, whether they register in the system or not, can receive notification of significant public health and safety events or hazards to their home phone number provided it is publicly registered.

WILL I RECEIVE ADVERTISEMENT CALLS OR SPAM ON MY PHONE?
NO, Inspiron Logistics, the company behind the Wireless Emergency Notification System (WENS) does not tolerate spam text or e-mail messages.
Nuclear Energy FAQs

HOW IS NUCLEAR ENERGY MADE?
A nuclear energy plant is much like a power plant that burns coal or oil. The difference is the source of heat. At the Beaver Valley Power Station, heat comes from uranium instead of coal or oil. Uranium atoms are split to produce heat. The heat is used to turn water into steam. The steam runs a turbine generator to make electricity. When uranium atoms are split, radiation is produced. Normally, a nuclear power plant releases very small amounts of radiation as a gas. At most, this will add only one or two millirem to the normal dose received by people who live near the plant. This radiation is less than the limit set by the law. No radiation is released from cooling towers.

WHAT IS RADIATION?
Radiation has been part of our natural environment since the Earth was formed. The planet is bathed in cosmic radiation from outer space, and radioactive materials naturally present in the soil, rocks, air and seawater also emit this type of energy. From the very beginnings of human civilization, radiation has been part of everyday life.

SOURCES OF RADIATION
We are exposed to small amounts of radiation every day. It is in the air we breathe, the food we eat, even inside our own bodies. It is normal to be exposed to small amounts of radiation, but to be safe, you should limit the amount. Radiation doses to people are measured in millirem. The average American receives over 300 millirem of radiation per year from nature – medical procedures, such as CT scans, add about the same amount of radiation dose.

HOW IS RADIATION CONTROLLED?
The U.S. Environmental Protection Agency and the U.S. Nuclear Regulatory Commission are the principal federal agencies responsible for establishing radiation protection regulations. EPA establishes standards to protect the general environment. The NRC prescribes and enforces limits on the amount of radiation that workers and members of the public can receive from commercial use of radioactive materials.

Radiation safety is based on time, distance and shielding. The less time spent near a source, the less radiation dose received. The greater the distance from a source, the less radiation dose received. Shielding also plays a vital role. For example, dentists place a lead blanket on patients receiving X-rays. Used nuclear power plant fuel is stored underwater or in steel-lined concrete containers to protect people from penetrating radiation such as gamma rays.

Although scientists have found no adverse health effects from doses lower than 10,000 millirem, radiation experts recommend keeping doses from man-made sources as low as reasonably achievable.

Special Needs Information Card

COLUMBIANA COUNTY RESIDENTS

IMPORTANT:

If you are a farmer and require special assistance during a radiological emergency, please fill out and return this response card.

COLUMBIANA COUNTY EMERGENCY MANAGEMENT AGENCY

MUST PLACE TWO PIECES OF CLEAR TAPE WHERE INDICATED

NO STAPLES

COLUMBIANA COUNTY EMERGENCY MANAGEMENT AGENCY

MUST PLACE TWO PIECES OF CLEAR TAPE WHERE INDICATED

NO STAPLES

COLUMBIANA COUNTY EMERGENCY MANAGEMENT AGENCY

As a producer, you may have special needs during an emergency, such as how to shelter and care for your livestock or what to do with your crops and food. By filling out and mailing this card, you will help the disaster team protect and provide resources and information that your family may need in an emergency or a disaster.

This information will be used for emergency management purposes so we may contact you in the event of an emergency or other special situation.

PLEASE TAKE A FEW MINUTES TO COMPLETE THIS CARD AND MAIL IT EACH YEAR.

Recommended Routes During an Evacuation

Evacuation routes are controlled by police for efficient movement out of your area. Once outside the 10-mile Emergency Planning Zone, use appropriate routes to your destination. If you need a temporary place to stay, continue on the designated route to your identified Reception Center. At the Reception Center you will be given directions to a Red Cross Mass Care Center nearby.

PREPARATION CHECKLIST

1. **MAKE A PLAN ON WHERE TO MEET IN CASE SEPARATED DURING THE EMERGENCY.**
2. **KEEP AN EMERGENCY BAG OF SUPPLIES IN YOUR CAR:**
   - Seasonally appropriate clothing
   - Sealed drinking water
   - Flashlight and extra batteries
   - First Aid Kit
   - Maps
   - Blankets
   - Battery Powered Radio
3. **WHAT TO TAKE IF I’M TOLD TO EVACUATE — IF TIME ALLOWS**
   - Medications
   - Baby food/formula
   - 3 Day food and water supply
   - Credit cards/cash
   - Important papers
   - Two changes of clothes per person
   - Extra pair of shoes per person
   - Blankets/sleeping bags for everyone
   - Toiletries
   - Eyeglasses/contacts
   - Flashlight, radio, extra batteries
   - Cell phones/chargers/needed electronics
   - Emergency contact phone numbers
   - Maps
   - If able to take pet: pet food, water

Please remove this preplanning page and carry it with you when you evacuate.
