LOGISTICS AND SUPPLY CHAIN MANAGEMENT

Deliver essential commodities, equipment, and services in support of impacted communities and survivors, to include emergency power and fuel support, as well as the coordination of access to community staples. Synchronize logistics capabilities and enable the restoration of impacted supply chains.

MISSION AREA

Response

FUNCTIONAL AREAS

- Access to community staples
- Donation management
- Emergency power provision
- Fuel support
- Private resources
- Resource delivery
- Resource management
- Resource tracking
- Supply chain restoration
- Volunteer management

EXAMPLE WORDING

Buckeye County EMA has identified private sector suppliers of community lifelines, such as power, fuel, food and water, and determined the location of the source of the supply (e.g. warehousing locations, drinking water sources and distribution lines, electrical grids, origins of fuel or manufacturing supplies).

Local businesses participate in continuity planning and local emergency planning to assist Buckeye EMA in identifying vulnerabilities related to supply chain disruptions within and outside the jurisdiction.

Examples demonstrate options to consider and are provided for training purposes only. The examples are intended to demonstrate how planning teams may incorporate the key tasks found on FEMA’s Core Capability Development Sheets into planning documents (e.g. the Emergency Operations Plan, Mitigation Plan, Debris Management Plan, HazMat Plan, and so forth). The items in the Functional Areas section are FEMA-identified areas where gaps could exist for the associated core capability. Counties should not re-design their Emergency Operations Plans around the Core Capabilities; stakeholders should integrate the capabilities within the EOP and in a format that is effective for the jurisdiction.
