RISK MANAGEMENT FOR PROTECTION PROGRAMS AND ACTIVITIES

Identify, assess, and prioritize risks to inform Protection activities, countermeasures, and investments.

MISSION AREA

Protection

FUNCTIONAL AREAS

- Analysis tools
- Data Collection
- Incorporating risk assessments in exercise design
- Risk assessment
- Risk communication
- Risk management planning

EXAMPLE WORDING

Buckeye County EMA and local partners analyze data to perform risk assessments for county assets, specifically when addressing terrorism threats.

Buckeye County and its subjurisdictions consider current risk assessments when writing plans and designing exercises to ensure partners train against likely, probable scenarios for domestic terrorism in their community.

Examples demonstrate options to consider and are provided for training purposes only. The examples are intended to demonstrate how planning teams may incorporate the key tasks found on FEMA’s Core Capability Development Sheets into planning documents (e.g. the Emergency Operations Plan, Mitigation Plan, Debris Management Plan, HazMat Plan, and so forth). The items in the Functional Areas section are FEMA-identified areas where gaps could exist for the associated core capability. Counties should not re-design their Emergency Operations Plans around the Core Capabilities; stakeholders should integrate the capabilities within the EOP and in a format that is effective for the jurisdiction.
