SITUATIONAL ASSESSMENT

Provide all decision makers with decision-relevant information regarding the nature and extent of the hazard, any cascading effects, and the status of the response.

### MISSION AREA

Response

### FUNCTIONAL AREAS

- Analyzing information
- Assessing hazard impacts
- Delivering situation reports
- Stakeholder engagement
- Tracking response activities

### EXAMPLE WORDING

The Buckeye County EMA consolidate information into SITREPs, situation updates, and briefings, as required, to describe and document overall response activities. The Planning Unit of the County EOC provides information to the Command Staff concerning all aspects of response and recovery operations to include evacuations, shelters, damages, injuries and fatalities.

Buckeye County EMA monitors respective EOC partners in order to maintain and update status boards with current information, maps, charts and other means such as computer displays.

Additional Training Courses: [https://www.firstrespondertraining.gov/frt/npccatalog](https://www.firstrespondertraining.gov/frt/npccatalog)

Examples demonstrate options to consider and are provided for training purposes only. The examples are intended to demonstrate how planning teams may incorporate the key tasks found on FEMA’s Core Capability Development Sheets into planning documents (e.g. the Emergency Operations Plan, Mitigation Plan, Debris Management Plan, HazMat Plan, and so forth). The items in the Functional Areas section are FEMA-identified areas where gaps could exist for the associated core capability. Counties should not re-design their Emergency Operations Plans around the Core Capabilities; stakeholders should integrate the capabilities within the EOP and in a format that is effective for the jurisdiction.
