SUPPLY CHAIN INTEGRITY AND SECURITY
Strengthen the security and resilience of the supply chain.

MISSION AREA

Protection

FUNCTIONAL AREAS

- Analysis of supply chain dependencies
- Implementing countermeasures
- Implementing physical protection
- Integrating security processes
- Verification and detection

EXAMPLE WORDING

Local law enforcement provides escorts for transport of supplies through or within the county to distribution points or to manufacturers to maintain local, state or national supplies of critical resources.

Local businesses participate in continuity planning and local emergency planning to assist Buckeye EMA in identifying vulnerabilities and interdependencies within the supply chains of critical resources within and outside the jurisdiction.

Additional Training Courses: https://www.firstrespondertraining.gov/frt/npccatalog

Examples demonstrate options to consider and are provided for training purposes only. The examples are intended to demonstrate how planning teams may incorporate the key tasks found on FEMA's Core Capability Development Sheets into planning documents (e.g. the Emergency Operations Plan, Mitigation Plan, Debris Management Plan, HazMat Plan, and so forth). The items in the Functional Areas section are FEMA-identified areas where gaps could exist for the associated core capability. Counties should not re-design their Emergency Operations Plans around the Core Capabilities; stakeholders should integrate the capabilities within the EOP and in a format that is effective for the jurisdiction.
